# Clothing Recycling Program

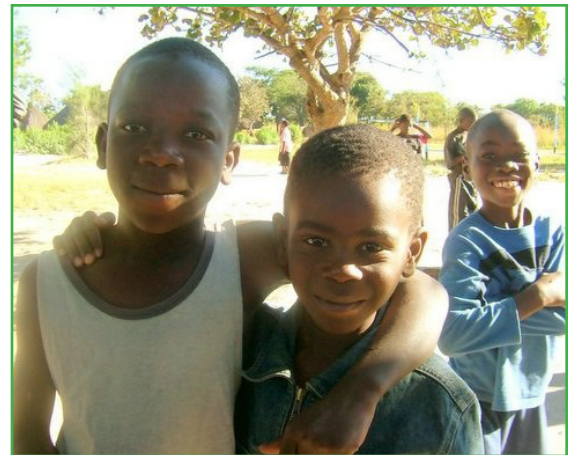

*in co-operation with Planet Aid Canada, Inc.*

We all have good quality clothing that we no longer have use for. Clothing may sit for months in the closet and can pile up quickly.

Many people would rather donate clothing to a good cause rather than throw it away, but this can be inconvenient. For people who live in apartments or condominiums, this means the clothing often ends up in the building's garbage collection area.

***Planet Aid Canada, Inc. wants to work with you to solve this problem.***

We are a non-profit tax-exempt charitable organization, founded in 1997, dedicated to improving people's living conditions in countries less fortunate than ours. We collect used clothes to support communities in Africa. The clothes are resold to raise funds for development projects including schools, community health programs, HIV/AIDS programs and food production.

We are inviting you to participate in our unique recycling program.

You can choose from several options:

1. Planet Aid will place a collection box in your outdoor recycling area.
2. Planet Aid will place a collection box inside your building (parking garage, garbage room etc).
3. You dedicate one or two of your existing recycling bins to clothing collection.

Planet Aid Canada will come and pick up weekly or bi-weekly. Extra pick up can be arranged.

## **Facts about the collection box:**

The collection box is made of metal. **It is 3'x4' at the base and 7' high.** The color is light yellow.

The box is clearly marked with easy to follow instructions. Planet Aid Canada, Inc. maintains sufficient liability insurance. **Contact us to set up a meeting and get your program started**
